About Me

My passion is in designing, developing, and deploying web applications. I would make a great addition to your team because of my willingness to embrace changing technologies, collaborate with others, and take on rewarding challenges.

Skills

- Front End Development: React, JavaScript, HTML5, CSS3/Sass
- Back End Development: Node/Express, Firebase, MongoDB, Python
- Testing/Version Control: Jest, Git
- Experience using: React Native, AWS, Adobe XD
- Understanding of general coding standards including SEO, cross-browser compatibility, and accessibility basics, and risk and information systems control (CRISC)

Experience

- Self Projects:
 - Designed and built web applications with user authentication and C.R.U.D functionality
 - <https://simply-fit.dkolodz1.vercel.app>
 - UI/UX designed through Adobe XD
 - Built with React and Firebase
 - <https://github.com/DanielKolodziej/iDatabaseIT>
 - Help desk glossary where IT staff can manage instructional posts to view.
 - Built using React, Node/Express, MongoDB.
- IT Support Specialist at Interior Investments: 01/2019 – 07/2020:
 - Solving help desk requests, monitoring multiple server locations, maintenance and setup of employee's devices, working with application developer on company related websites.
